- 2. Sheet iron. The quote of 2,975 tons of sheet iron was dependent on the expension of the disensury copper works. Difficulties were encountered, however, in the organization of fire-resistant meterials for the construction of furnaces was tennormally holded. Bucause of the low shearing capacity, sheet metal was delivered ment-
- I Mendings and dromforgings: The only plant producing those items, the Mitteldeutsche Canschenfabrik AG at Bebitz, was able to fulfill the quota while working at 95.4% of capacity. The plant experienced difficulties in the procurement of more belts, emery wheels, and carbide.
- 4. Pig iron essaince: Difficulties in this field lay, especially during the first half of 1947. In the procurement of pig iron and coke. Deliveries from the Maximilian-Witte were completely inadequate from the point of view of quality
